### Deluxe Hock Boot

Top quality, Deluxe Hock Boots are made with long lasting, dense neoprene padding with nylon lining. These unique boots are formed for proper fit to protect the hocks from stall sores, used during shipping or to reduce swelling. Sure fit design will eliminate the need for bandaging while velcro fasteners provide snug, secure fit. Bound edges and seam reinforcement adds extra strength and durability.

#11145 pair

### Easyboot

The Easyboot is the ultimate in hoof protection and one of the most important items you should carry with you on any ride. Prevent lameness and frustration when you lose a shoe far from home and still finish your ride without compromising the health and safety of your horse. Easyboots can also be worn in place of steel shoes or even over steel shoes for additional protection, traction and cushioning on rocks and hard ground. These boots are ideal for horses with laminitis, founder, abscesses and other hoof related medical problems. Made from durable urethane and in sizes to fit most horses, these boots will outlast any steel shoe. Available in 11 sizes.

How to get the correct size boot for your horse:

1. Measure the width of the hoof across the bottom at the widest point.
2. Measure the length of the hoof from the toe to the buttress line of the heel. The buttress line is the farthest weight bearing point of the heel.
3. Compare your measurement with the proper size chart below.
4. Ideally, the width and length measurement will fit into the same Easyboot Epic size. If the width and length measurements indicate different Easyboot Epic sizes, select the larger Easyboot Epic size. If the width and length measurements are different by more than one size, EasyCare hoof boots are not recommended.

NOTE: Replacement parts are available.

#1368 each

### Easyboot Cable & Buckle

Easyboot Cable & Buckle is a replacement cable and boot buckle for the Easyboot and Epic boot. Available for sizes 0, 1 & 2.

Image courtesy of EasyCare Inc.

#1381 each

### Easyboot Epic

The Easyboot Epic horse riding boot is ideal for the barefoot horse, aggressive conditions or for a horse who is difficult to keep booted. The attached Easyboot Gaiter provides extra protection to the hoof as well as keeps excess dirt and debris from getting into the boot. It also helps keep the boot on during extreme conditions such as mud, snow, and water crossings. This is an excellent boot for long distance riding. Available in 11 sizes.

How to get the correct size boot for your horse:

1. Measure the width of the hoof across the bottom at the widest point.
2. Measure the length of the hoof from the toe to the buttress line of the heel. The buttress line is the farthest weight bearing point of the heel.
3. Compare your measurement with the proper size chart below.
4. If the width and length measurements indicate different Easyboot Epic sizes, select the larger Easyboot Epic size. If the width and length measurements are different by more than one size, EasyCare hoof boots are not recommended.

NOTE: Replacement parts are available.

#1369 each

### Easyboot Gaiter

Easyboot Gaiter can be added to all sizes of Easyboots. Helps improve performance on barefoot horses and in muddy terrain or on horses that have a tendency to lose hoof boots.

#1379 each

### Easyboot Glove

Easyboot Glove is a form fitting, seamless boot that hugs the hoof and responds like a natural foot. Flexible and tough, this boot adds traction to the hoof, while allowing a free stride and breakover. Like a glove, this boot provides protection without stifling mobility.

Images courtesy of EasyCare Inc.

#1873 each

### Easyboot Grip

The Easyboot Grip is essentially the Easyboot Epic with an aggressive sole and traction tread pattern. The Easyboot Grip is ideal for the barefoot horse ridden in soft muddy conditions or wet grass and snow surfaces. The aggressive traction pattern provides better grip on these surfaces but should never be used on dry surfaces or hard surfaces. The Grip should be used in soft soil conditions or soft wet grass and snow surfaces only. Although the Easyboot Grip provides increased traction in slippery conditions, riding horses in wet, muddy and soft conditions is dangerous and should be done at your own risk. Sold individually in sizes 0, 1, 2 and 3 only.

NOTE: Replacement parts are available.

Images courtesy of EasyCare Inc.

#1370 each

### Easyboot Rx

The Easyboot Rx is just the prescription for horses requiring a therapy boot that offers stability and support without being heavy. It provides support and relief for horses suffering from lameness, laminitis, founder, navicular and lower limb/hoof problems. It is an excellent choice for those horses that simply have difficulty standing on hard surfaces for extended periods of time. The boot can be used to speed recovery and offer protection after surgery or injury, lessen fatigue and add protection during trailering.

Images courtesy of EasyCare Inc.

#1947 each

### Easyboot Trail

The new Easyboot Trail is the easiest hoof boot in the world. The Easyboot trail can be easily put on and removed by young or old hands. The infinitely variable attachment system assures booted success for a broad spectrum of hoof sizes and shapes throughout the trim cycle. The boot opens up completely to easily slip on and off over most hoof shapes and sizes. The rear double Velcro attachment protects the entire hoof wall and keeps the boot firmly in place. If you are a pleasure rider or a backcountry rider, this is the boot for you. The Easyboot Trail is recommended for medium-distance riding of up to 25 miles per week. Available in sizes 0 to 10.

#1614 pair - 6 mm  
#1615 pair - 12 mm

### [Easycare Gaiter](#)

Easycare Gaiter is for use on Old Mac G2 and Boa Boots. Recommended for sandy or muddy conditions, it helps to keep sand and dirt out of the boot. Available in sizes small, x-large, and xx-large.

#1380 pair

### [EasyCare Old Macs G2 Horse Boots](#)

Old Macs G2 Horse Boots have a unique hi-tech performance outsole, incorporating the unique Hoof Suspension System. The specially developed Thermo Plastic Urethane (TPU) compound will minimize and help speed up recovery from concussion-related injuries. If your horse suffers from any of the following - arthritis, pedal bone fractures, jarred shins, navicular disease, ringbone, knee fractures, laminitis (founder), bruised soles or hoof walls and scalping from overreaching, an Old Macs horse riding boot will benefit your horse. Aimed at improving your horses soundness, well-being and performance, these boots will extend your horses working life!

NOTE: Replacement parts are available.

#1384 each

### [EasyFoam Kit](#)

Newly reformulated EasyFoam consists of two liquid components. When mixed and poured into an Easyboot before fitting, EasyFoam seals out all dirt and debris, cushions and protects the hoof and acts as an adhesive. EasyFoam is recommended for horses used in extreme conditions such as competitive long distance events, deep mud or rocky terrain.

#P900 12 per case

#### [Neoprene Ankle Boots](#)

Strong, Neoprene Ankle Boots with durable velcro fasteners provide excellent protection for the fetlock and ankle area while reducing wind puffs and sweating down enlarged joints. May be used for protection when trailering or in stall. Available in black in front or hind.

#T5211 pair

#### [Neoprene Hock Sweat Boots](#)

Neoprene Hock Sweat Boots are formed for proper fit to protect the hocks from stall sores, during shipping, or to reduce swelling. Sure fit design will eliminate the need for bandaging while velcro fasteners provide snug, secure positioning. The wide center seam reinforcement adds strength and protection. Available in black only.

#T5206 pair

#### [Neoprene Knee Sweat Boots](#)

Neoprene Knee Sweat Boots are used as an aid to sweat down swollen knees or as outstanding protection in the stable or when trailering. Velcro closures provide maximum security and comfortable fit. Can also be used while riding or training. Available in black only.

#T5208 pair

#### [Neoprene Pastern Boot](#)

Neoprene Pastern Boot is constructed of top quality heavy neoprene with velcro closure for a secure, custom fit. This boot is designed specially to offer support and protection. Available in black.

#EHL080 pair

#### [Neoprene Run Down Sesmoid Boots](#)

Neoprene Run Down Sesmoid Boots are thick boots that give maximum protection to the sesmoid area from bruises and abrasions. Boots are made with tough reinforced textured rubber cover over the heel area. Velcro fasteners keep them securely in place. Available in black only.

#T5220 pair

#### [Neoprene Skid Boot](#)

Neoprene Skid Boot is constructed of high-density neoprene. Features heavy duty PVC protection cups that holds up under the harshest ground conditions. Close, clean fit provides plenty of comfort and protection. Attaches easy with on/off velcro closures.

#10274 pair

#### [Neoprene Splint Boots](#)

Neoprene Splint Boots are padded with nylon skin which provides a superior fit and premium protection. Boots stretch and form to the horse's legs like a second skin. The neoprene also provides optimum flexibility and freedom of movement while the tough textured rubber pad provides remarkable protection to the most fragile area of the leg. Velcro closures make for an easily adjustable fit. Available in black, red or royal.

#EHL078 pair

#### [Neoprene Splint Boots](#)

Neoprene Splint Boots are made with top quality neoprene to provide a superior custom fit. The durable rubber pad aids in providing remarkable protection to the most fragile area of the leg. Quick grip velcro closure keeps boots firmly in place. Available in black only.

#T5205 pair

#### [Neoprene Tendon and Ankle Boots](#)

Neoprene Tendon and Ankle Boots provide support and protection for the tendon and ankle. Easy and convenient fasteners keep boot secure. Also features a rubberized protection strip. Available in front (11-1/2" tall) or hind (12-1/2" tall) in black only.

#T5222 pair

#### [Open Front Tendon Boot](#)

Open Front Tendon Boots are hi-tech polymer outershell with closed cell neoprene padding that is nylon lined. Elasticized velcro straps with a double lock feature that helps hold boot in place. Available in two sizes: small/medium or large/x-large.

#1654 pair

#### [Reflective Leg Wrap](#)

Reflective Leg Wrap is 2 1/2" wide felt with reflective outer strip and easy to use velcro closure. 12" long.

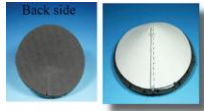

#10376 pair

#863 pair

### [ICE HORSE](#) [Big Black Boot with Polymer Shoe](#)

ICE HORSE  Big Black Boot with Polymer Shoe provides therapy for hooves affected with ailments as severe as laminitis or as simple as a stone bruise. One size fits all.

#6000IH each - 1 Boot with 2 FIRST+ICE 

### [ICE HORSE](#) [Evendura](#) [Low Knee Pastern/Fetlock Wrap](#)

ICE HORSE  Evendura  insulated low knee to pastern/fetlock wrap utilizes the same construction as the ICE HORSE  Tendon Wrap, while adding more leg coverage.

#2750IH pair - 2 Evendura  Wraps (pair) with 8 FIRST+ICE 

### [ICE HORSE](#) [FIRST+ICE](#) [Replacement Packs](#)

ICE HORSE  FIRST+ICE  contains a patented Propylene Glycol formula which is food grade for quality assurance and non-toxic properties. Re-freezable and re-usable after three hours in the freezer.

#3000F 12 per case

### [ICE HORSE](#) [Hind Leg Wraps](#)

ICE HORSE  Hind Leg Wraps are anatomically designed to offer coverage from above the hock down to the pastern/fetlock area where excess swelling associated with Lymphangitis, Cellulitis or Edema indicates that cold therapy is required. Can also be used when heat therapy is called for. Includes 1 pair of Hind Leg Wraps, Adjustable Support Strap System, and sixteen FIRST ICE  Inserts.

#9500IH pair

### [ICE HORSE](#) [Hock Wrap with FIRST+ICE](#)

ICE HORSE [Hock Wrap](#) is open over the cap bone, light weight and is sized and shaped to give full, consistent coverage for optimum therapy. Comes with 2 FIRST+ICE [inserts](#).

#7000IH each - Hock Wrap with 2 FIRST+ICE [inserts](#)

### [ICE HORSE](#) [Knee to Ankle Wraps](#)

ICE HORSE [Knee to Ankle Wraps](#) are top quality insulated and extra long wraps that cover the knee completely and extend to the fetlock/ankle area. These full coverage wraps envelop each front leg with six cold/heat inserts. An adjustable suspender hangs over the withers and supports both wraps when applied to the horse. The suspender attached securely with hook and loop closures that are easily removed when the therapy is complete. The unique design both conforms to the horses leg and provides optimum compression, assisting the cold penetration of inflamed soft tissue. After just three hours in the freezer they are ready to use again. This wrap can easily be used for targeted heat application.

#F2206 pair

### [ICE HORSE](#) [Tendon Wrap](#)

ICE HORSE [top quality insulated cannon bone/tendon leg wraps](#) stay cold for up to two hours of convenient and thorough cooling of the tendons, ligaments, muscles and connective tissue.

#1000F each - 1 Tendon Wrap with 2 FIRST+ICE [inserts](#)

#1165

### [Leg Soaker Replacement Coil](#)

New Improved Leg Soaker Replacement Coil for the #974 Leg Soaker.

#974C each

### Leg Soakers

Unique and very efficient, Leg Soakers with new unbreakable coils are a state of the art irrigation system which releases an even distribution of cool water on the entire diameter of each leg. The plastic coils are self-releasing so there is no fear of your horse getting tangled. The design is so flexible that the hose can be placed overhead or on the ground in any desired position.

#974 each

### Neoprene Ice Boots

Neoprene Ice Boots are designed for highly efficient cold therapy with the simplest application for all performance horses. Made of neoprene material which insulates and promotes maximum cooling. The design of the boot with elastic pockets for crushed ice will rapidly work to reverse the harmful effects of heat and swelling to the entire lower leg, including the fetlock area. Velcro closures and reinforced areas where velcro adheres makes for a secure fit. Available in red, royal, green and black. 19" tall with 6 pockets and 24" tall with 9 pockets.

#985 pair - 24" 9 pocket

#1285 pair - 19" 6 pocket

## WHIRLPOOL BOOTS

### Jacks Whirlpool Boots

Jacks Whirlpool Boots have over 50 years of reliability behind these effective therapeutic boots. The industrial 100-volt compressor produces aeration around the coronet that massages, reduces swelling and aids in injury recovery. Quiet running for high-strung animals. The boots are soft vinyl, built for years of use, yet soft so they will not harm the leg. Water depth and temperature can be varied, and medication (water-soluble) can be added to suit your horse's needs. Use as a pair or for individual leg treatment. Unlike "tub" type hydrotherapy systems, you get full 360 degree aeration and the ability to roll up the boots - they are compact enough to fit the whole set into a tack trunk and still have room to spare. All this for less than most tub type units. Boots can also be used on the rear legs.
