

ELECTROLYTE GOLD

Premium Electrolyte Supplement

Horses cool their bodies primarily by sweating in large amounts. Sweating results in the loss of not only water, but also essential electrolytes. Low electrolyte levels in horses can result in poor performances due to dehydration, muscular problems such as 'tying up' syndrome and lactic acid build up in the muscles. Electrolyte losses are significantly increased during hot weather and increased exercise. This places even greater importance on the practice of regular and routine electrolyte supplementation.

The first choice of top professionals is **ELECTROLYTE GOLD**.

Premium quality **ELECTROLYTE GOLD** delivers potency, palatability and high absorption with the benefits of antioxidant vitamins for maximum results.

Composition

	per 50 g	per 1 Kg
Sodium Chloride	10,200 mg	204,000 mg
Sodium Citrate	1,650 mg	33,000 mg
Potassium Chloride	8,830 mg	176,600 mg
Magnesium Sulphate	600 mg	12,000 mg
Calcium Carbonate	7,400 mg	148,000 mg
*Vitamin C	750 mg	15,000 mg
Vitamin E	1,000 iu	20,000 iu
*Glycine	6,250 mg	125,000 mg
Glucose	13,320 mg	266,400 mg

*Not recognised as an essential nutrient by the FDA.

Feeding Instructions

ELECTROLYTE GOLD should be added to the normal feed ration.

For Pre-Race and Competition

Horses: One 50 g sachet per day.

In Hot Climates and Horses in Transit:

One 50 g sachet per day.

Horses in Light Training:

One 50 g sachet every second day.

Fresh drinking water should be available at all times.

Complementary (Dietetic) Feedingstuff

Presentation: Powder sachet 30 x 50g, 100 x 50g

ELECTROLYTE GOLD is a scientifically formulated product containing essential electrolytes and vitamins in an amino acid and glucose base.

- **ELECTROLYTE GOLD** makes available essential electrolytes when they are lost through sweating.
- Replacing lost electrolytes will help 'refresh' horses in training, resulting in consistent top performance.
- **ELECTROLYTE GOLD** contains the antioxidant vitamins: Vitamin E (1,000iu) and Vitamin C (750mg) per 50g sachet. Both of these antioxidant vitamins protect muscle tissue by eliminating 'free radicals', a noxious by-product of exercise.
- **ELECTROLYTE GOLD** contains the amino acid Glycine which has been shown to assist the rate of absorption of electrolytes.
- **ELECTROLYTE GOLD** is formulated using a glucose base which is a rapidly metabolised energy source.
